## ACADEMIC PROJECT AND SEMINAR

### ❖ *MINI PROJECT: - Amusement Park Management System.*

**Front End** : PHP  
**Back End** : MySQL

The project titled APMS is aimed at developing a website that has been designed in view of the management of amusement parks quite easily, efficiently and accurately. The APMS project has two main sections. The primary section is the internal park management website and the secondary is the external website. The internal website is used for managing a part of the park and it is accessed by the park administrator.

Three modules are there: admin, staff and user

### ❖ *MAIN PROJECT: - E-Post office*

**Front End** : JSP  
**Back End** : MySQL

E-Post Office is the postal service Online portal .The main aim of this project is to automate the duties in a post office and provide online purchasing. It sells Postcards, Stamps, and Envelopes and has services like courier etc. Administrator of the website is the main user of portal and it is possible to take postal accounts such as savings account and insurance accounts.

Three modules are there : admin, staff and user
