Project Details:

Project #1

Project Name: PlexusWater

Environment: Drupal 7

Synopsis: Plexus Water & Energy is an alliance of professional engineers offering engineering and environmental solutions to the municipal, mining, power generation and processing sector.

The site is fully admin configurable from backend. We can add new services, projects based on services, banners images etc.

Project #2

Project Name: Loba

Environment: Drupal 7

Synopsis: Loba is an alumni site of Loyola School, Trivandrum. A Loyolite can register on Loba. And he can host Upcoming events and Meetups, he can post blogs and post a job. He gets to know the GLA events and Alumni success stories and all the school functions, galleries through this site.

Project #3

Project Name: Social News Cloud

Environment: Laravel, Ajax, JQuery, HTML, CSS

Synopsis: SNC is a social news website. Here there are two types of users – People and Source. An individual can register in SNC and could follow sources, make connection with other users and follow clouds, and like, share, follow and comment posts of other users Cloud represents a group. An individual can create a cloud on a particular topic and other users can follow this cloud to get updates. The users can post news. The news posting is done using Url Extraction. The Sources like TOI etc. can register in SNC and add posts. Sources have graph analytics on followers count, redirects and engagement. The main aim of this website is to know how much a news gets popularity around the world through SNC.

Project #4

Project Name: Teqbuzz

Environment: Core Php, MySql

Synopsis: Teqbuzz is a GPRS tracking site. A GPS device sends location related information as packets and using socket programming the information is send to the open port and the useful data is retrieved and stored to database. Using this information from database we can track the vehicle location through this site.

Project #5

Project Name: Sanskey

Environment: Core PHP, Ajax, JQuery, HTML, CSS

Synopsis: The Sanskey website advertises electronic items. The admin part has the provision to list customer complaints and the admin allocates the complaints to desired workers. The admin can add, delete and assign work to customer service workers. The CS workers also have the provision to view the assigned tasks. After the service they have to update their work progress. And accordingly the admin would assign and reassign or close the registered complaints.

Project #6

Project Name: Kerala Hotels Online

Environment: Code Igniter, Ajax, JQuery, HTML, CSS

Synopsis: The admin part of Kerala Hotels Online was to add, update and delete hotels. The admin had the provision to assign the facilities, types of rooms, charges per room, and other facilities to each hotels.
