Projects

1. **SMART CASCADING (JAVA)**
   Developing a website which handles with all kind of works regarding constructions. Here users can upload images and other details of a plot where which they wanted to make buildings, home etc. Then the Builders in this site can view the plots and can bid for construction permission. Also the builders can go to stores and can buy goods like stones, marbles, etc. The users can view plans and can forward it to Vaasthu experts to check the Vaasthu details of that plan.

2. **MOBILE SECURITY APPLICATION (ANDROID)**
   Developing a mobile application which handles mobile security is for society. The main objectives of Mobile Security Application project is to analyse and build a social security application which helps the user to ensure their safety using their mobile devices. The Security application app user must install and register to the application by entering their profile information and family contact details. If anyone facing difficulty, they can send alert message from their mobile phone. The mobile will send alert message to their family members and safety team (Police) with location.
