Academic Projects

➢ **Mini Project : Dealership Management System as a Service**
ENVIRONMENT : ASP.NET with C#(Front end) & MS SQL(Back end)
Dealership management system helps to connect dealers and companies for executing their valuable business via cloud. The system focus to implement B2B commerce as a cloud service. System allows Companies to manage their dealers and provide information on new products and parts. Dealers can purchase new products and parts from the system.

➢ **Main Project : Transport Management System**
ENVIRONMENT : PHP, MYSQL and WampServer
Transportation agencies rely upon traffic management systems and services to manage their freeways, arterial networks and rural highways. Transport Management System provides an efficient way in terms of maintaining the total number of buses, their repair schedule, the alternative buses or spare time management, driver or employee time attendance etc.
