PROJECTS

➢ Completed project on MULTIBAND MINIATURISED FRACTAL ANTENNAS FOR MOBILE COMMUNICATIONS.
➢ Completed project on CONNECTING AGRICULTURE TO THE IOT THROUGH SENSOR NETWORKS .
➢ Project on BOOKSTORE Using Xamarin Forms

BOOK STORE

The main objective of Book Store Application is to bring an entire book store online and makes it easy for both buyer and seller to make deals on books. The project consists of list of books displayed in various models and designs. The user may browse through these products as per categories. If the user likes a product, he or she can add it to shopping cart. The user can view the items based on the price in increasing or decreasing order. If user wish to buy a product, he or she must be register into the application by providing required details and login to the application using their username and password. User can buy the product through cash on delivery.

There are two modules:

Admin :- Admin can add, update and view product information as well as can view the order information .

User :- User can view different products added by the admin and can add the product to cart that he or she like and buy the product.
