Career Objective

To get associated with the company that provides creative and prospective work-ambience, leading to the fulfillment of innovative programs and projects in that what that enhances the best interests of the company and also of mine.

Work History

Quintet solutions Pvt. Ltd, Edappally, Kochi (Nov 2012– present)

Web Developer

I'm working in web development team of Quintet Solutions. Scope of work includes designing and developing customized web applications.

Roles and Responsibilities

- Participating in discussions with clients to clarify what they want.
- Developing consistent websites that have a better look and feel.
- Identifying and correcting software deficiencies.
- Developing Application Programming Interface for mobile applications.
- Developing and maintaining front end functionalities of websites.
- Developing applications having payment processing features.
- Worked on multiple projects simultaneously.
- Performed maintenance and updates to existing client websites.
- Aptitude to look into new emerging technologies.

Projects

During my career, I am able to work in wide variety of web based projects. I have worked as a part of team and as an individual in the following projects.

Golf Event & Course Management System	
Project Description	A web and mobile based system for managing Golf courses and tournaments. Uses **PHP** as main server side script. Website features include event management, event promotions, event public pages, player registrations and payment. The real time mobile application is specially designed for golf tournaments.
Role	I have worked to implement API for the mobile application, payment feature integration, administrator and customer dashboard, implementing dynamic public pages for events.

Vendor Management system

Project Description	A web based solution for searching and managing vendors for language services like transcription. Uses **Ruby On Rails** at server side backend and **Angular JS** at front end.
Role	I have worked on a team to develop administrator and customer backend using **Rails**, implementing client side features using **Angular JS**.

Social Network	
Project Description	A social networking website using **Joomla** and **JomSocial**.
Role	I have worked for creation and customization of social networking features, developing API for mobile app, integrating SMS features using **TWILIO** API.

Promotion Management System	
Project Description	A web and mobile based solution for business promotions and notifications. Using PHP **LARAVEL** framework for server side scripting.
Role	I have worked on a team for developing website features with multiple user roles, API development for mobile application.

Internal Projects	
Role	During my career at Quintet Solutions, I have worked in internal projects like Asset Management System and Project time tracking system.
